# Classroom Training

iMod™ - Wire Management Made Easy

The iMod™ is a wire management system which organizes and conceals your computer wires within a compartment located on the backside of the unit. A removable modesty panel provides easy access and protection to your electrical and data components.

## iMod™ Features:

- Hides wires and cables for a clean, uncluttered look
- Provides added security and safety
- Allows easy access to the CPU
- Includes wire management channel, power strip, and end grommets for easy networking
- Laminate or metal removable modesty available
- Made in the USA

Utilizing a built-in wire management channel, the iMod™ keeps cords organized and safely out of harms way. Users no longer need to worry about getting their feet tangled in cables. The concealing modesty panel removes any wires from sight and creates an organized and clutter free look in any classroom or environment.
